

8 The Thesis Management software

The software tool "Thesis Management" (Gestión de Tesis in Spanish) allows doctoral students, thesis directors and tutors, program coordinators and members of the Academic Commissions and administrative support, ED personnel and external agents (external evaluators and members of the court) to carry out all on-line processes.

Access to the application for students, directors, and other participants, members of UPV, is done through the UPV Intranet.

Access for external evaluators and court members will be made through an invitation that will contain a link with direct access.
