

6.1 The external evaluation of the thesis draft

Once the first draft of the thesis (version 1) is completed, an external evaluation process must be passed.

To be able to initiate this process it is required:

- Have completed the minimum number of hours of activities required by the doctoral program (recognized in the doctoral student's academic record).
- Having completed the first draft of the thesis agreed by the thesis supervisors

The draft of the thesis will be sent to a group of researchers external to UPV experts in the subject of the thesis.

The process starts by the thesis director, making the proposal of external evaluators.

You can check the detail about the process in this [link](#).
