4.7 Changes in the title of the thesis

The initial proposal of the title of a thesis is given when registering the research plan of the thesis.

Once the research plan has been accepted by the academic committee of the corresponding doctoral programme, there will be two ways to propose changes to this title:

A.- When making the annual report on the progress of the thesis (in June).

B.- When uploading the first draft of the thesis (V1) before the proposal of external evaluators.

In both cases, the approval of the thesis supervisor will be requested, and the commission will have the option of accepting the proposal or rejecting it.
