# 1.3 Documents to upload with your application

The application to access to a PhD programme (pre-registration) is made through this web page.

To complete the application you must upload the documentation that is related in this link.

In addition to the aforementioned documentation, it is advisable to provide a proposal for a research plan and, if possible, a recommendation from the thesis supervisor or tutor.

If any of your prior degrees (bachelor or master ) are from a non-Spanish university, you should consult this link.

In the case of degrees issued by states outside the EHEA, all the academic documents (transcripts and degrees) must be duly legalized. The deadline to submit this documentation will be one year from the first registration.
