

2.3.3. How can I know a journal's impact factor?

You can see the Journal Impact Factor in the database [Journal Citation Reports \(JCR\)](#). You have to be at the UPV or have a [VPN](#) connection.

To access via [PoliBuscador](#), type in the *Journal Citation Report* search box and click on *Available online*.

Once in the JCR, you can search for the journal by title, ISSN, category or keywords.

The world's leading journals and publisher-neutral data

Select the journal you are interested in from the search results.

In the next section, you will see the *Journal Impact Factor* of the current year, and data from other years in *View all years*.

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a JIF.

Further on, the *Rank by Journal Impact Factor* is shown, with the following data: Edition, Categories, Quartile and Percentile.

Rank by Journal Impact Factor

Journals within a category are sorted in descending order by Journal Impact Factor (JIF) resulting in the Category Ranking below.
